Experienced with MongoDB database management software ,source control management systems like Git, front end JavaScript frameworks . 2+ years of Experience building and maintaining server side applications with Node.js and using express.js and fastify.js (both node.js frameworks).

Willing to relocate: Anywhere

Work Experience

Full Stack Developer (Node.js / Vue)

Mixam Business - Lagos, Nigeria.

August 2021 to April 2023

1. I designed a user friendly front-end interface for the company's web application with the intention for users to be able to locate key information about the application and sign in / Sign Up Easily quickly
2. I integrated various services to ease the user's process of signing in to the website.
3. Designed Highly functional pages that focused on optimized performance and speed and non-blocking operations using asynchronous functions and promises.
4. Designed the back-end for the application using node.js and fastify.js, integrating several cloud services to ensure high performance of the application.
5. Designed and maintained the application database (MongoDB) with the efficient use of external modules and queries.
6. Ensured that the application API's all were functional and had good performance.

Full Stack Developer

Freelance (car blog website) - Lagos Nigeria

October 2022

My Role In This Project

1. Created a stylish but minimal homepage design to ensure the project (A blog) has the good feel, but also have a professional feel to it.
2. Designed the blog article templated to ensure a user friendly, readable and easily understandable article layout.
3. I created an admin interface with node.js and vue.js that will be used to manage and update the blog.
4. Using a hosting service, I registered the domain name and hosting for the site.
5. I ensured a good communication and relationship through out the duration of the project.

Front End Developer

Personal Project (A Scientific Calculator) - Lagos

August 2020

My Role.

1. Designed an easy to use User Interface for the calculator
2. Created dynamic functionalities such as theme changing, calculation mode selection.
3. Ensured that the code was simple and maintainable.

Notable Accomplishments

1. I was able to practice Object oriented programming, the whole calculation interface is put in one class and all the necessary methods with it.
2. Practiced how to interact with the DOM without any frameworks. All the functionalities in the application are vanilaj.js
